

Announcing
in ten body types and many colors

HUDSON'S Great Eight

A fine fast powerful Eight ...
to sell at Hudson's well known prices

We count this our greatest achievement. From front end to tail light it is a new design. In appearance and finish it is commandingly beautiful. In speed it is faster than you will probably ever care to drive. And in smoothness it surpasses anything we know.

Owners of the costliest cars will find equal pride of ownership in Hudson's Eight. The satisfactions they enjoy are now continued with no lavish outlay of money.

In distinction, appearance and fineness they make no sacrifice. They will enjoy every

comfort of fast, restful and safe driving. They will find material savings in car operating cost.

This is not just an eight cylinder motor. It is not just a different radiator or body. It is a completely new car throughout. Being Hudson designed and Hudson built, it has an individuality that conforms to no standardization model. It is available in such a wide variety of colors that there is no commonness in appearance.

It has faster speed than you probably will ever care to know. And it has such road-

ability that you can safely and comfortably command every driving situation.

In riding ease it is a revelation to the most experienced. The driver finds it responsive and alert. He is freed from all driving tension. He relaxes. The passengers rest while they ride.

Hudson's Great Eight meets with every motoring requirement that heretofore was obtainable only at high cost. It saves in first cost alone more than enough to meet its operating expense for a whole year.

The price at which it sells questions the wisdom of ever paying more for any car.
