

Movies of your golf, for instance!

Make Your Own Moving Pictures

SIMPLE—Fascinating—and by no means as expensive as you would expect.

Without experience or any special training you can take and show moving pictures the equal of those seen in high class theatres.

Golf and other sports, outings, travel and business events are best chronicled with moving pictures, while the "Filmo" captures forever the pulsing reality of childhood.

"Filmo" Gives You the Fleeting Smile, the Outstretched Arms, the Rush of Tiny Feet

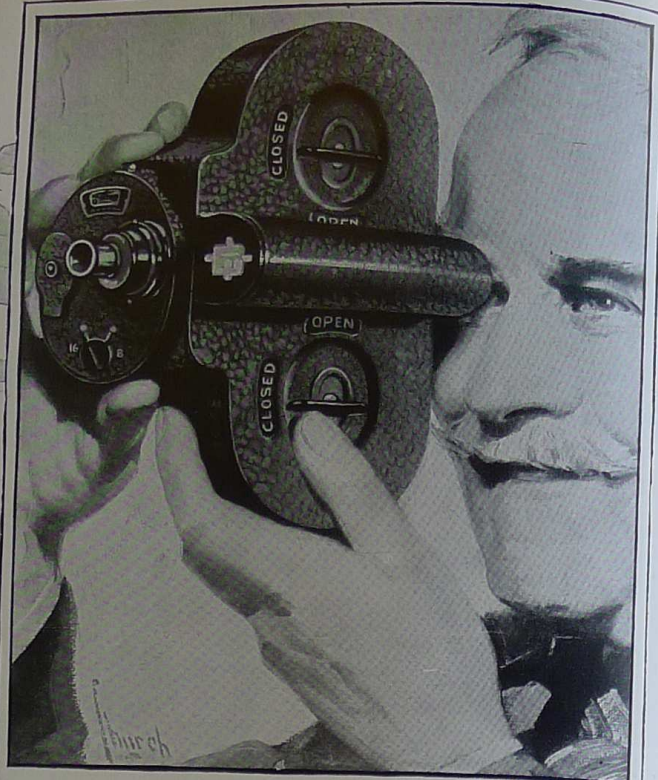

NATURALLY only the best motion picture camera is the wise purchase. You must have a camera perfected in every detail. A camera that gives you service as reliable as your electric light switch. No camera can compare with "Filmo" in ease of operation—just press the button and you take what you see.
