## Romance!

**YOU** can have pearls from the floor of the ocean; pearls with the shine of the sea in them and the changing colours of tropical waters; pearls for which men have gambled their lives a dozen fathoms deep in the sea; from St. Margharita, from the Persian Gulf and from Ceylon's Coral strands.

Or you can have pearls made by the gross from glass and liquid ammonia—rows of pearls turned out as easily and perfectly as rows of buttons.

For the lover of fine and beautiful things, no substitute exists for real pearls. Their beauty's value, not to be duplicated, lies in their beauty's genuineness.

When you buy Oriental pearls of fine quality, you acquire not only the intrinsic value of the jewels, which never changes, but a permanent investment in satisfaction and beauty.

Ryrie-Birks have beautifully matched strings of Oriental pearls priced from \$300.00 to \$30,000.

May we send you our interesting little Brochure; "The Romance of the Silver Craft"?
