

Take hold of life with BOTH hands..

Above: Interior of Mrs. S. F. Lawrason's conservatory, London, Ont.
Below: Exterior of conservatory built for A. W. Marsh, Esquire, Niagara Falls Ont.

... let us build you that small conservatory . . . now!

For your own and your family's pleasure . . . for the sake of all your healths remember not to forget Winter.

Thrill to the glorious Spring days with all your heart . . . but don't waste them!

While you rejoice in Spring, make sure that Winter will never get the chance to weary you again. Get ahead with the small conservatory you've been considering so long. The moment is opportune now . . . plenty of time to plan . . . and fair weather ahead in which to do the building.

You may be contemplating a wee "Dream Garden", a small leanto, or something more pretentious. You may desire it attached to your house, or in the garden. You may (and this is an excellent idea) wish to incorporate Vita Glass which lets the healthful ultra violet rays through.

In any case let's get together and give the matter proper thought.

Illustrated booklets are always to be had, post-paid, upon request to our Toronto Office Correspondence, or a chat, with us in no way obligates you.
